sheet

Art – Please could you find examples of sculptures from around the world. You could draw them, make a PowerPoint or create a poster of them. Maybe you could visit an art gallery online, like The Louvre in Paris, and record what you saw. You could focus on one sculpture, one artist or lots of different ones.

Science—We are looking at how different materials can change state when either heated or cooled. Can you investigate what happens to chocolate when you heat it and then cool it. Can you then explain what has happened through images, drawings and explanations. You can present this in anyway you would like. Make sure you get an adult to help you with any heating or cooling investigating that you do.

Humanities – This half term we are learning about the Shang Dynasty. Please produce a fact file on Lady Fu Hao. Think about who she is, why she is remembered and what she accomplished during the Shang Dynasty. You could include information and illustrations about the discovery of her tomb and what the artefacts found suggest.
