sheet

Science—During this half term it is British Science Week, the theme for this week is 'Time!' It is also the 30th anniversary of British Science Week, so we would like children to research how things have changed in the past 30 years! Children can produce a poster, information page or powerpoint showing what new inventions and discoveries have been made during this time.

Humanities - This term in humanities we are studying Geography and exploring how features of the UK have changed over time. Children need to choose an area of the UK coastline to research and produce an informative fact file / poster / ppt etc, with illustrations showing how this part of the coast has changed over time. I.e. has it formed bays and beaches, has the headland changed to form caves, arches and stacks?
