DT

Electrical Circuits

Draw three different circuits using only these equipment:
a bulb, a cell, a switch, a motor, a buzzer and wires.

Humanities

This term we are developing our map skills in Geography and we would like you to create your own treasure map on the squared paper provided. Don't forget to include 4-figure grid references and compass points and you could write your own question for someone to answer. An example map is shown in the image.

Science—Electricity & States of Matter

Even though we are still working on our Electricity unit, our next topic is all about States of Matter. We would like you to research the Water Cycle and produce a piece of work explaining or showing the different aspects within it. You can do this using any medium you want including a poster, PowerPoint presentation, a video/animation or a model using recyclable materials.
