Due Wed 19th Oct

20 minutes reading per day  
Spelling practice

TTRS and Maths sheet

Art—Create a collage of pictures by artists who have painted natural disasters. You can use computer club to print if you like.

Science - Properties of materials

Create a poster of natural and synthetic (man-made) materials found around your house. Label them with their key properties.

Humanities - This half term the children are focusing on key skills within Geography. We would like the children to explore maps and create their own versions of maps which show different parts of the world. These might include a world map, maps of continents and maps of specific countries. The children should label the maps with important geographical information and research places which they want to know more about.
